WEATHER OF CONCERN

Weather of Concern

Southern California:

- The strongest wind gusts will occur through the I-5 corridor and in the eastern San Gabriel Mountains of Los Angeles County.
- Some locally gusty north winds will occur above the San Gabriel Valley in the foothills and canyons into Tuesday afternoon.
- Winds will also be gusty in the foothills and canyons of the Santa Ynez Range in Santa Barbara County through late tonight.
- Winds will slowly turn more northeasterly across eastern Ventura and Los Angeles Counties later Tuesday morning and decrease through Tuesday afternoon.

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

High pressure off the CA coast will be our dominant weather feature through Friday. Afternoon temperatures will be around 10 degrees above normal today and 15 degrees above normal Wednesday through Friday. NW-NE downslope surface winds will reach 25-35 mph in wind-prone areas from the western Sierra slopes to the coast through Wednesday, especially during nights and mornings. Afternoon minimum relative humidity (RH) readings will be 15-25% in inland areas affected by the winds and 20-30% otherwise.

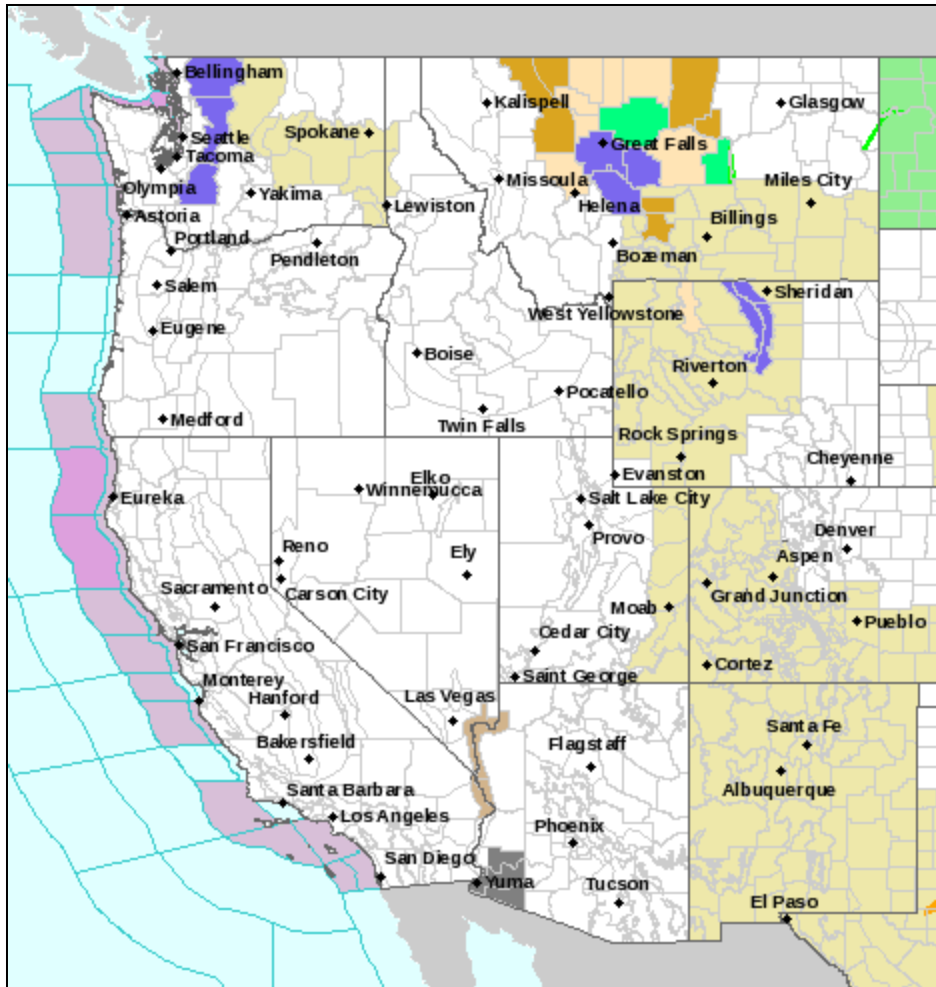

A weak low pressure trough will move across the region this weekend. Temperatures will be a few degrees cooler, but still above normal, and humidity will be higher. Skies will be partly cloudy, and there is a slight chance of a stray rain shower Saturday night. Another weak trough will move through Tuesday, possibly producing light rain in the northern half of the Northern California region. Dry and breezy weather is expected to follow the trough.

SOUTHERN CALIFORNIA

North to northeast winds of 15 to 25 mph with gusts to 40 mph will continue to surface across the mountains, deserts, and below the canyons and passes of Southern California through this afternoon as low pressure over southern Arizona moves east and high pressure over the Pacific Ocean approaches the California Coast. The high-pressure area off the California Coast will bring a warming trend to the region through Friday. Maximum temperatures will be in the 50s to low 60s across the mountains and upper 60s and 70s in the valleys today. Temperatures will reach the mid 80s over the warmer valley locations Thursday and Friday. Minimum humidity will be mainly between 15% and 30% through Friday. A weak area of low pressure will form off the Southern California Coast bringing a slow cooling trend and an increase in humidity to the region Saturday through early next week. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the wind prone mountain and desert areas Saturday through early next week. Isolated showers will also be possible over the mountains Sunday through early next week.
